7IWSCM 2016

The IWSCM, as part of the International Association on Structural Control and Monitoring (IASCM), is held every four-year, and is staggered by two years from each of the World Conferences on Structural Control and Monitoring. The first IWSCM workshop was held in 1993 at Honolulu, the second in 1996 at Hong Kong, the third at Paris in 2000, the fourth at New York in 2004, the fifth at Dalian, China in 2008, the sixth at Sydney, Australia in 2012, and the seventh is going to be held at Incheon, Korea in 2016. The workshops are typically smaller than the world conferences and serve as a focused forum to chart new directions in the field.

WORKING GROUPS (tentative)

**Working group 1:**

*Theme:* Smart materials, sensors, and devices; applications and challenges

**Working group 2:**

*Theme:* Structural vibration control; applications and challenges

**Working group 3:**

*Theme:* Structural health monitoring and life-cycle maintenance; applications and challenges

---

**Dr. Heungbae Gil (Korea Expressway Co., Korea)**
- Ph.D. University of Texas at Austin (1996)
- 2015–: Research Director, Seohae Bridge Maintenance Office
- 2001–2015: Research Director, Korea Expressway Co. Research Institute

**Prof. Saurabh Amin (MIT, USA)**
- *Robert N. Noyce Career Development Assistant Professor*
- Ph.D. University of California, Berkeley
- Robust infrastructure diagnostics and control
  - Incentive mechanisms for network security and reliability
  - Testbed for networked control systems

**Prof. Hui Li (Harbin Institute of Technology, China)**
- Ph.D. Harbin Institute of Technology, China (1994)
- 2016–: President of IASCM
- Chairman of Transportation Infrastructure Division in High-tech Program Committee in the Ministry of Science and Technology in China
- Founding Director of the Key Lab of Smart Civil Eng. of the Ministry of Industrial and Information Technology of China

**Prof. José Rodellar (Technical University of Catalonia, Spain)**
- Doctor in Physics (Control Systems), Universidad de Barcelona, Spain (1982)
- 2012–2016: former President of IASCM
- 2003–: Founder and Director of the Research Group CoDA lab
- 2007–2013: Director, Dept. of Applied Mathematics III, UPC
Objectives

**Theme:** Latest advances and applications in structural control and monitoring

**Objectives:**
- Network the researchers in the field
- Discuss the research trend and next stage work of task groups
- Promote structural control and monitoring in Korea
- Showcase the latest advances in structural control and monitoring

The workshop will follow its tradition to make an effort to create a true workshop atmosphere rather than simply another mini-conference with a series of presentations alone. There will be no call for submission of paper but the presentation title. There will be an opportunity for participating researchers to present a brief (on the order of 5 minutes) summary of works during the Working Group sessions.

About the University

The name of INHA University came from the combination of INcheon and HAwaii because the university was established by the donation from the first generation of Korean immigrants to Hawaii and Korean government subsidies. The university opened in 1954 after the Korean War as the INHA Institute of Technology with mission to foster excellent students who would contribute to the development of the nation’s scientific and technological industries. INHA has already produced as many as 160,000 graduates who are now leading the nation’s industries and science and technology. INHA currently educates 20,000 in 58 departments. Further information

For further information about the workshop, including how to book your place, please visit the website of [http://7iwscm.icesal.com](http://7iwscm.icesal.com) or contact 7iwscm@icesal.com

Scope of the Workshop

The workshop will focus on some aspects of:
- Smart materials and structures
- Smart sensors, wireless sensors, and sensor networks
- Smart control, smart actuators, dampers and systems
- Damage identification and localization, and model updating
- Safety evaluation and reliability forecast
- Life-cycle maintenance of infrastructure
- Structural health monitoring
- Structural control theories and devices
- Benchmark problems of structural control and monitoring
- Control and monitoring for mitigation, prevention, and alarm of disaster

Co-organizing Institutes

Incheon – Lonely Planet:  
Transportation

From the airport:
Visit http://7iwscm.icesal.com/transportation for more detail information

From hotels to INHA University:
- Shuttle bus: (in the mornings of July 25 & 26, 2016 only)

  - Holiday Inn
    www.holidayinsongdo.com
    08:00
  - Central Park Hotel
    www.centralparkhotel.co.kr
    08:05
  - Oakwood Premier
    www.oakwoodpremier.co.kr
    08:15
  - Ramada
    www.ramada-songdo.co.kr
    08:25

- Taxi: less than 30 min. from the hotels (about 10,000WON ≈ 10USD)

- Incheon Metro:
The Venue

7IWSCM 2016 workshop will be hosted by INHA University in its new 60th Anniversary Hall, Incheon, Korea.

The building is mainly used for the education of the first year undergraduate students with some lecture theatres.
